

## Using Skype for Business on your mobile phone

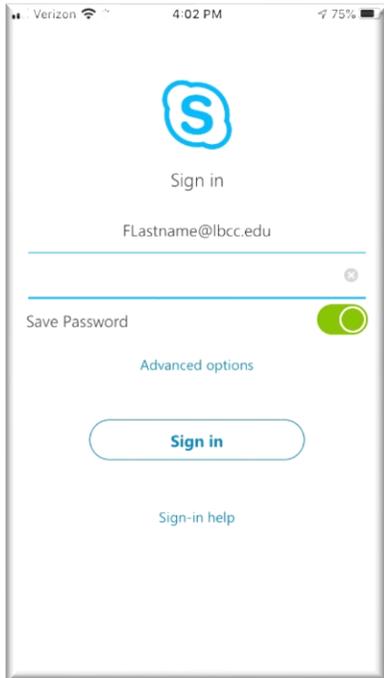

Download and install the **Skype for Business** client from your app store (Apple or Google)

When the install is complete, click on the app

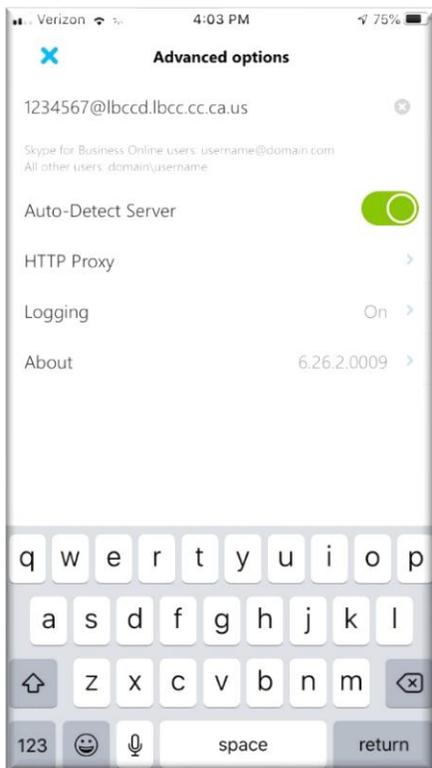

When you are prompted to log in, use

[FLastname@lbcc.edu](mailto:FLastname@lbcc.edu)

Under password type in your login password.

Then click **“Advanced Options”**

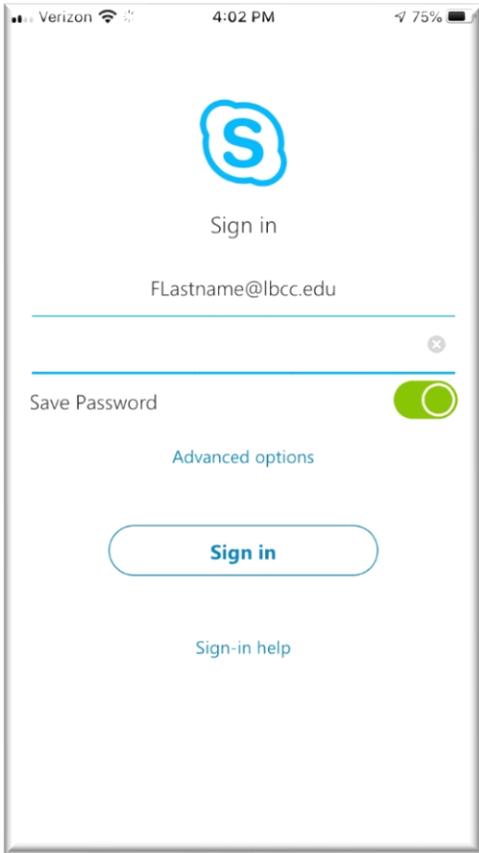

In there somewhere under Advanced Options you will see “name” field

Type in [1234567@lbccd.lbcc.cc.ca.us](mailto:1234567@lbccd.lbcc.cc.ca.us)

There are no proxy settings

Leave the “Auto-Detect Server” switched to ON

Then in the iPhone, click the blue “x” on the top left to go back to the previous login page

where you will see [FLastname@lbcc.edu](mailto:FLastname@lbcc.edu)

You should see ●●●●●●●● for your previously entered password.

You should now be able to press “[Sign In](#)”

Note: Android experience may be slightly different

When you login for the first time, You may be asked for the option of entering a forwarding phone number which you can type in or skip
